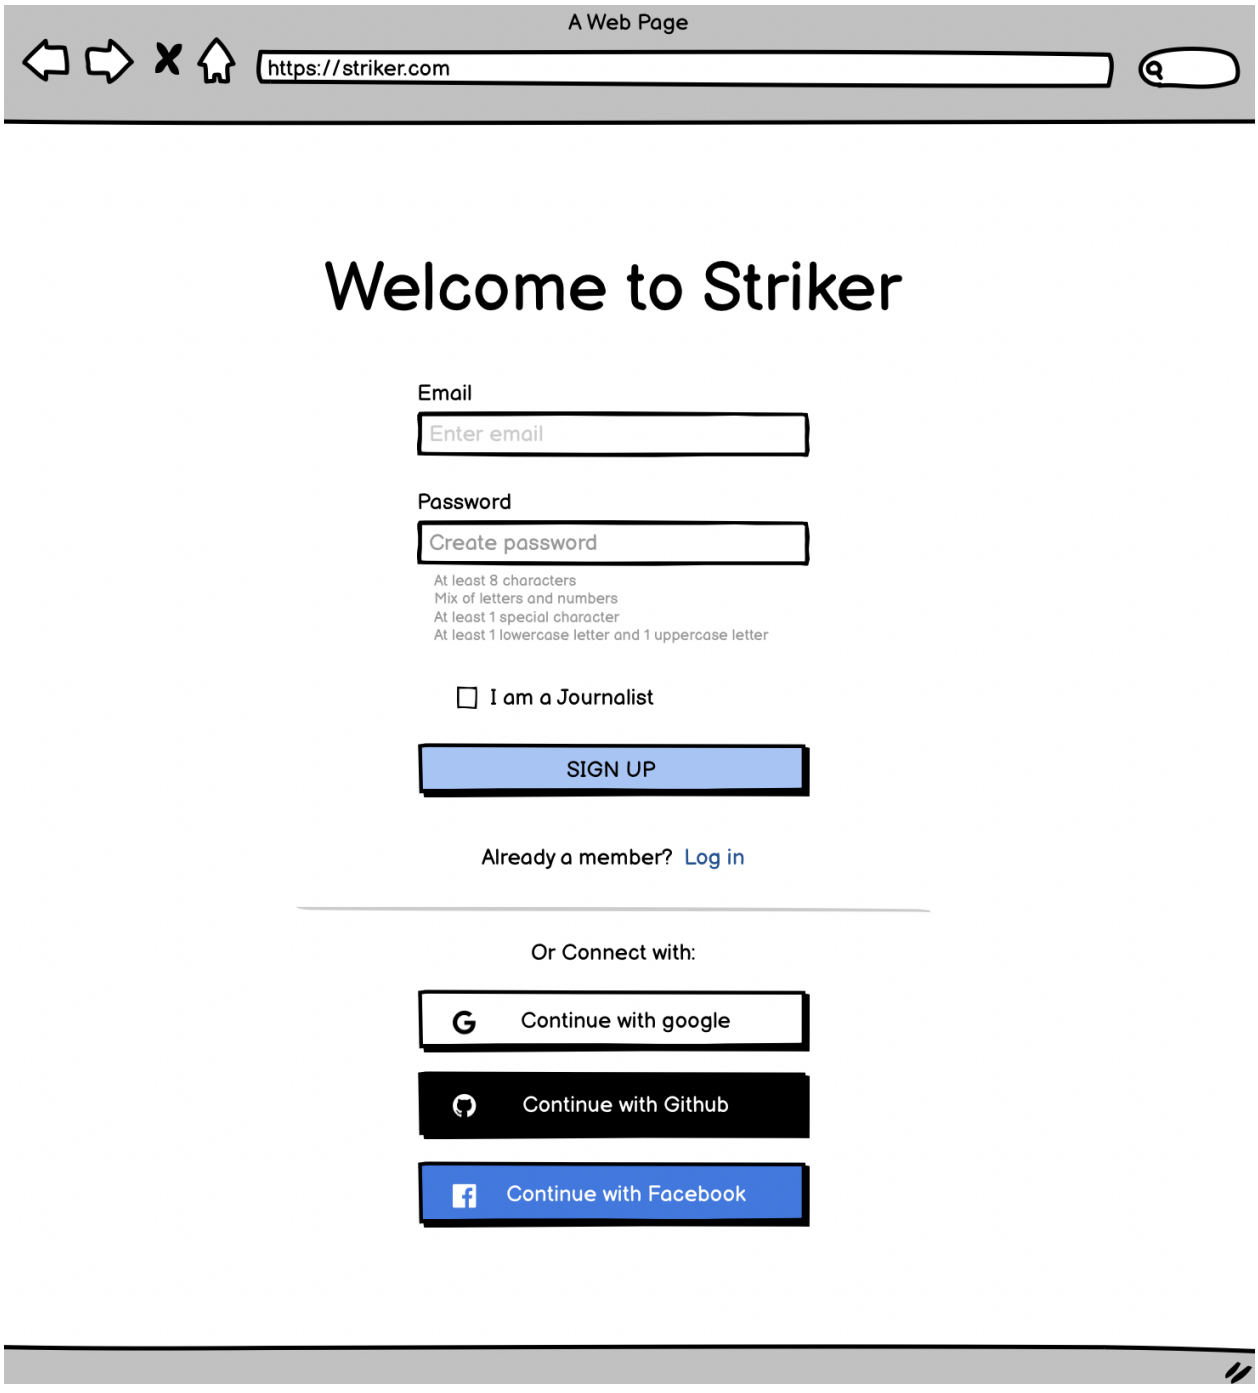
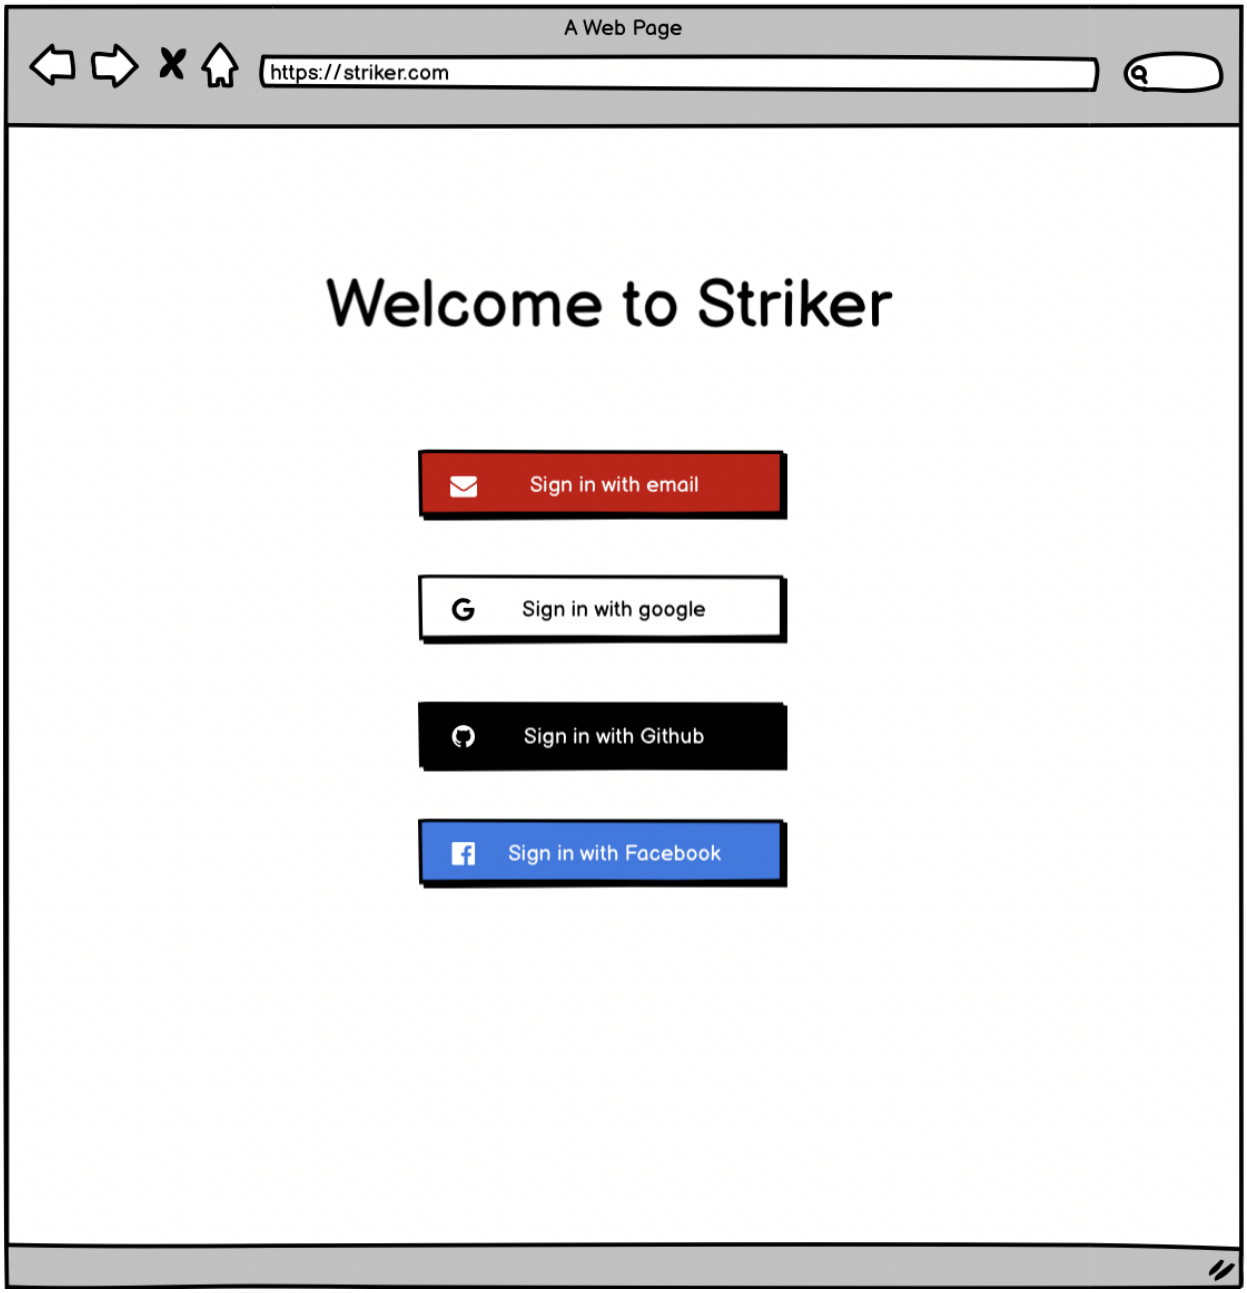
GUI For The User Signup Page



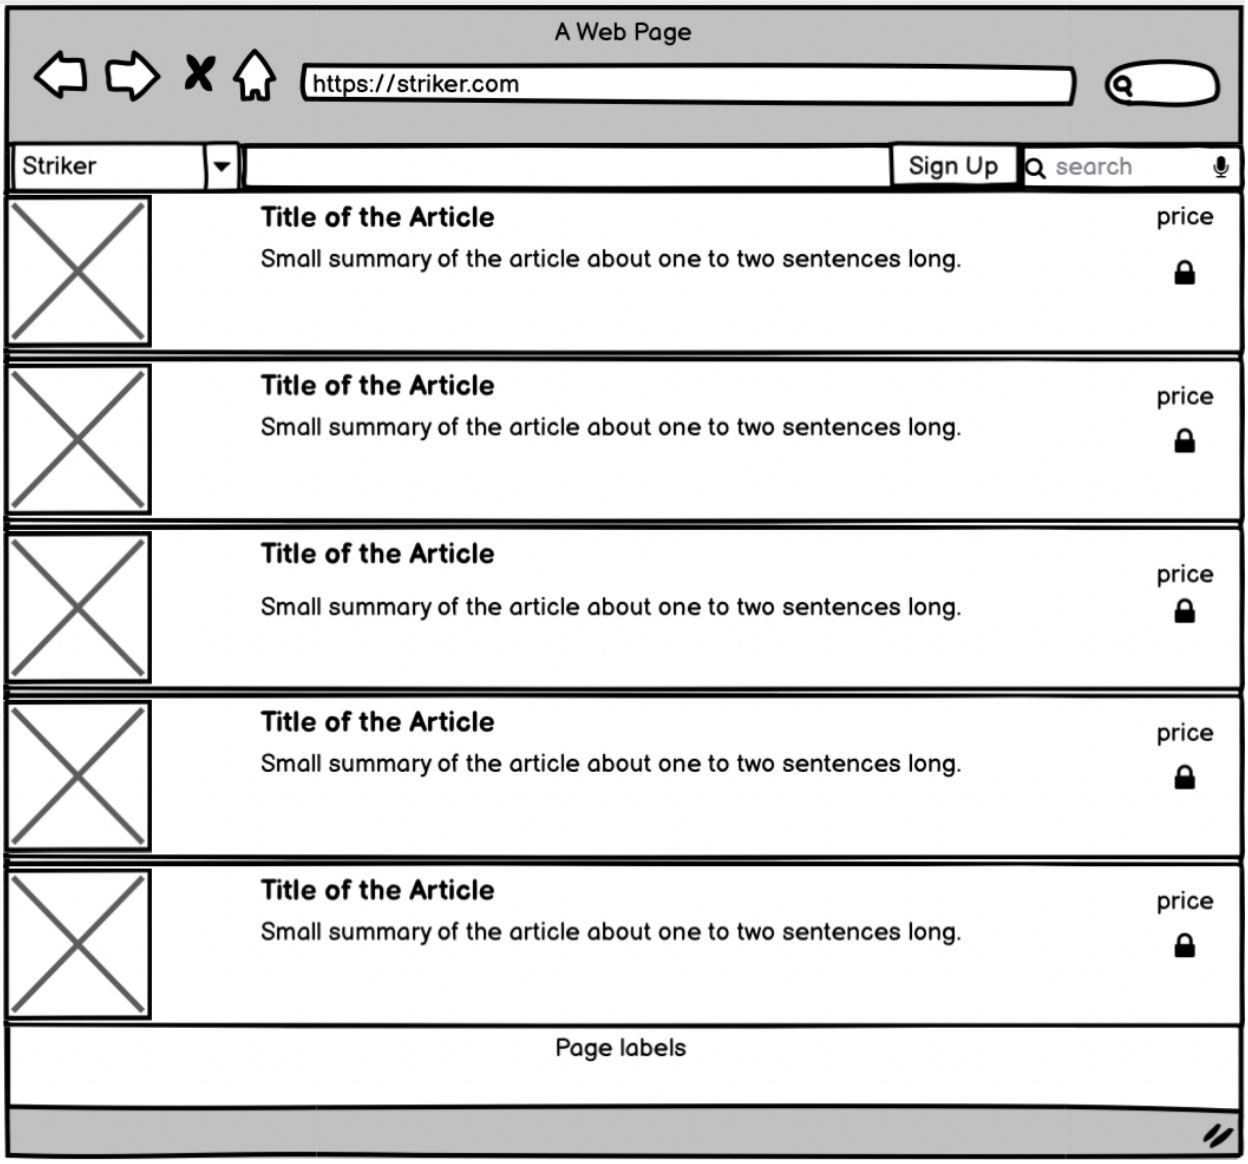
The user will have the option to sign up by creating an email and password or using their Google, Github, or Facebook accounts.

GUI For The User Login Page



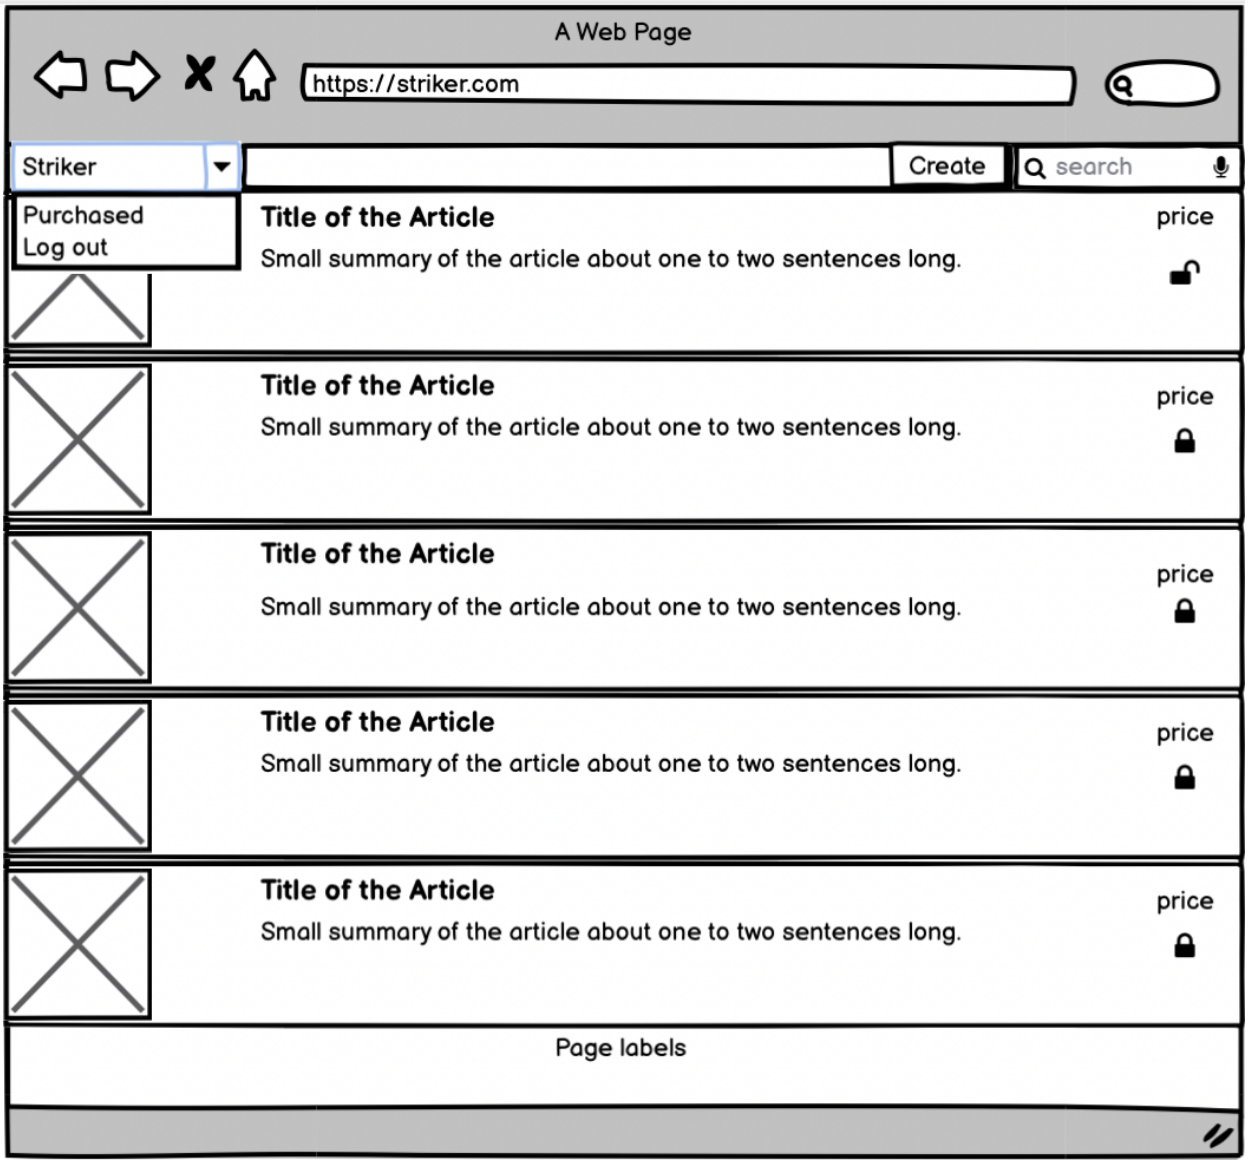
In addition, the user will also have the opportunity to sign in using their Email, Google account, GitHub account, or Facebook account. Thus, making it convenient for any user to utilize our platform.

GUI For The Home Page



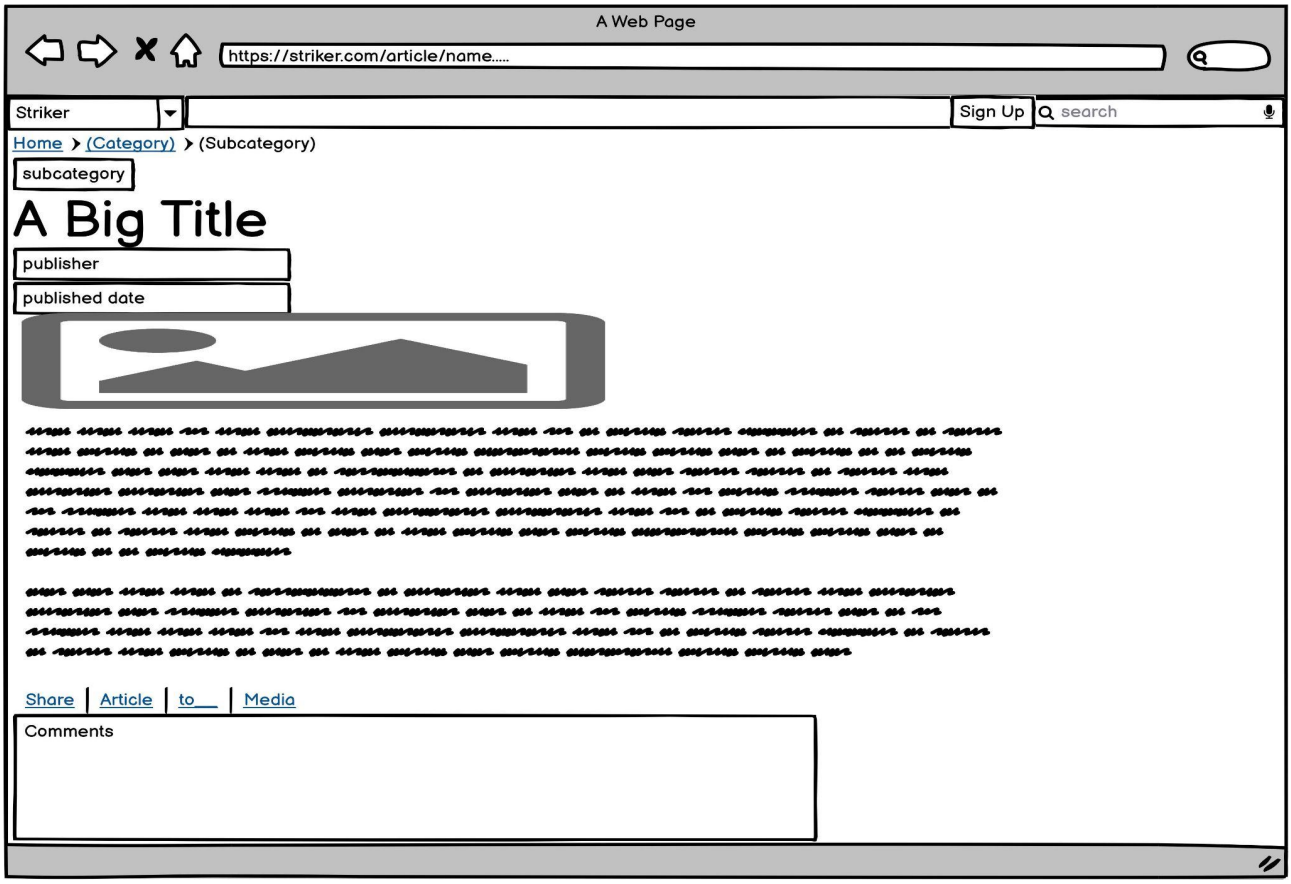
This is the homepage for Striker before a user logs in or signs up. The sign up button will redirect users to the mentioned sign up page where there will be a link to take the user to a login page.

GUI For Home Page



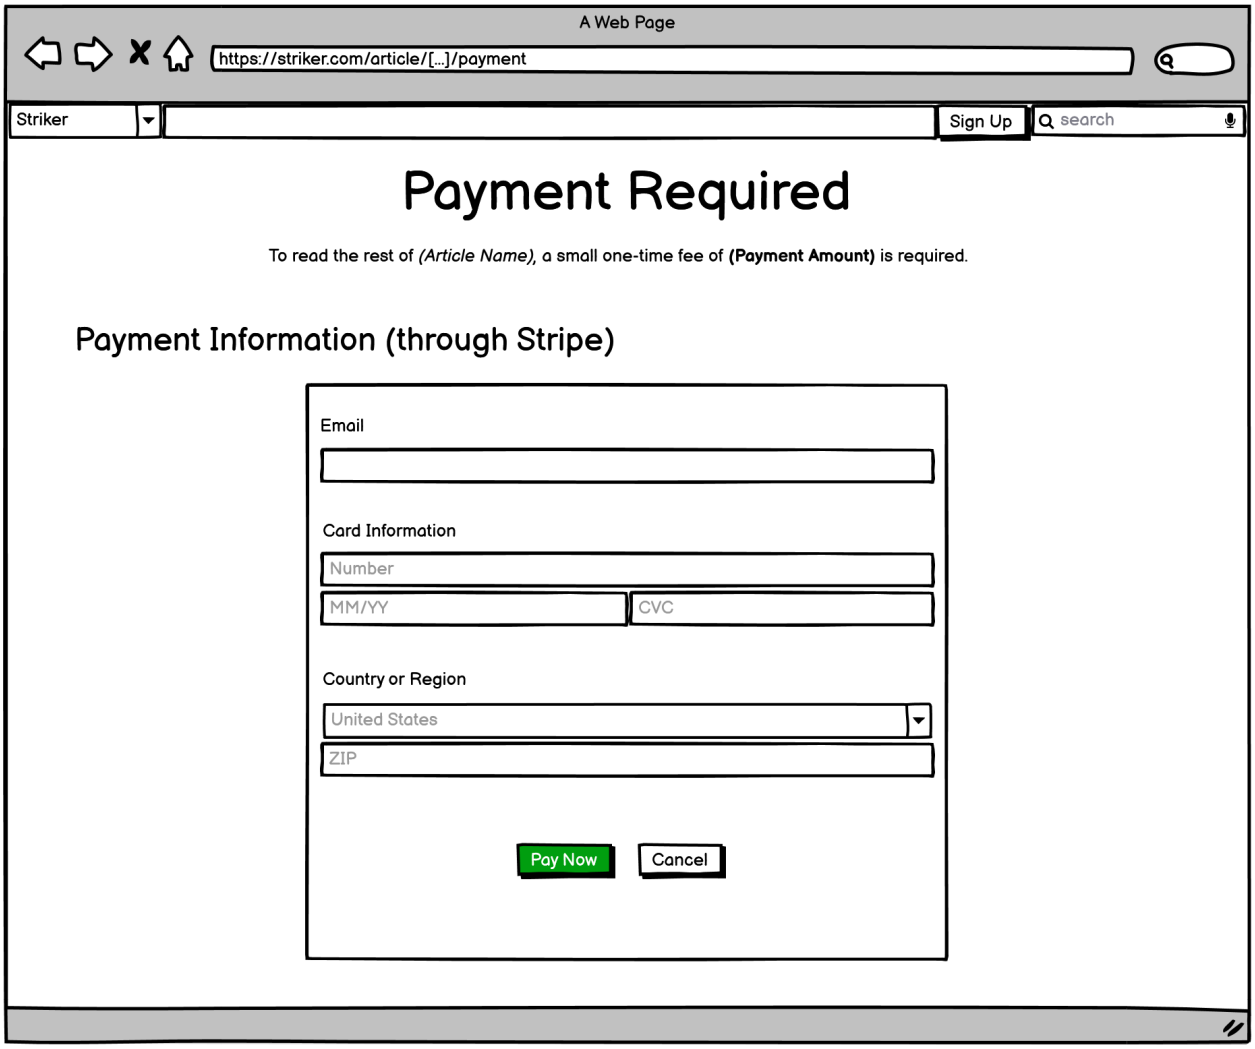
This is the home page that will show up when a user is logged in, only verified users will be able to view the create button, regular users home pages will not load that button. The purchased page will look like the home page but will only load articles that the user has already purchased indicated by the unlock logo.

GUI For The Article Page



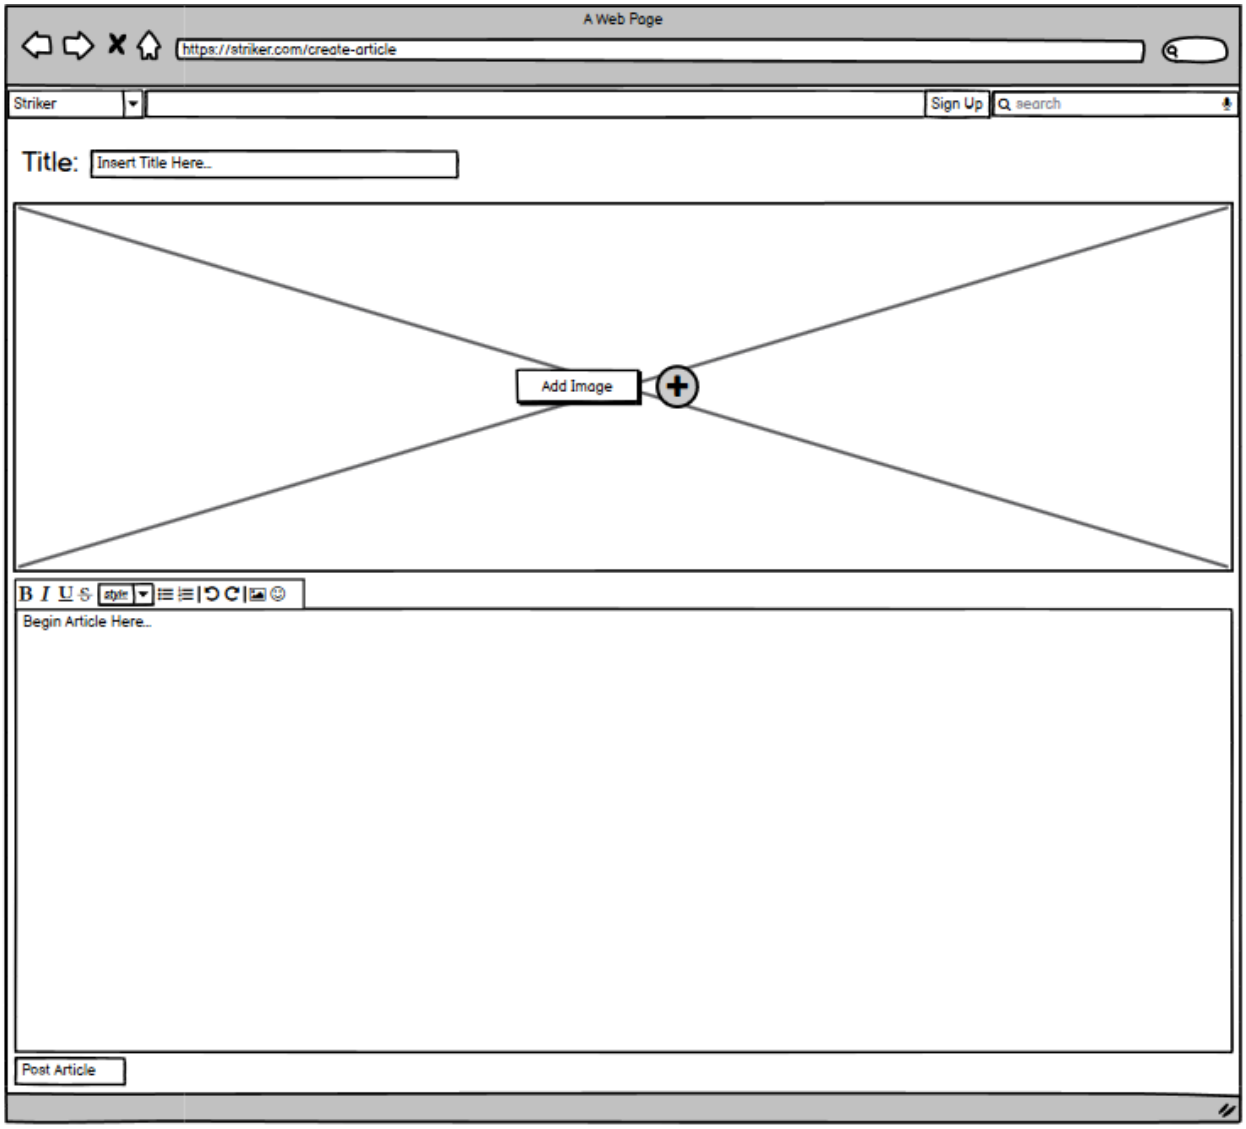
The article page for striker, after unlocking the article, users will be able to see this page.Breadcrumb navigation bar with category and subcategories for users to distinguish the page location. Basic title, publisher, date, picture, text information. Users can share the article to other media platforms at the end of each article. They can also share their options with each other.

GUI For The Paywall Page



When a user clicks on an article that they'd like to read on Striker, they will be taken to the Paywall Page as shown above. Here, they will be shown how much is required to access the particular article that they would like to read and can choose to pay the amount or return back to the previous page they were on. The payment will be handled through Stripe.

GUI For Content Creation Page



This is the page used for the creation of articles on Striker. Within this page, there is a field to insert the title of the article, an image to represent the topic discussed, and a field for the content of the article. The fields for author and date posted will be automatically filled in by Striker. Articles created from this page will be available on the main page.
